

MECHANICAL STEEL TUBING

L&R Industries' commitment to fabricating high quality, durable mechanical steel tube and pipe size ERW tubing has made us a trusted supplier for OEM's, retailers and distributors who demand high strength-to-weight ratios that are critical to their product performance. We have a direct relationship with the steel mill and order raw material specific to our needs, which means minimal waste and lower costs to you. Whether you need a short run of a few thousand feet, or millions of feet of mechanical steel tubing, L&R's tube mill has the capacity to meet your needs. Learn more about our product offerings and specifications online or contact us directly to answer all your questions.
